Al Barrak's Window Shutters are an ideal investment for your home that not only its appearance but also numerous benefits to your family and home.

Windows and doors are vital for everyday existence, But all for their necessity they also present serious insulation and security problems. Aluminum window shutters are manufactured from the highest quality Australian and European components.

Al Barrak's window shutters are "tailor made" to your specific requirements ensuring a perfect fit and operated from the comfort of your own home with a push button, remote control or manually.

- European Designed and made.
- Control the amount of light and ventilation into your home by adjusting the slats.
- Stops up to 90% of outside heat from entering the room through the window.
- Reduces summer cooling (saves air-conditioning losses) and winter heating bills.
- Protects furnishings from sun damage.
- Gives you control over your environment. and Allows greater privacy within your home.
- Reduces outside noise entering the window. Allows greater privacy within your home.
- Strong interlocking construction resists objects being forced between slats.
- Offer a visible deterrent to would-be intruders and vandals.
- Advanced window shutters enhance the appearance of any home.
- Available in various colors to suit individual decors.

Curtain Construction

Window shutter interlocked curtains are constructed from aluminum slats (profiles) which are filled with polyurethane foam that provides greater rigidity, security and insulating properties.

Operation

The controls are available to suit most applications including rod winders as well as electric motor and remote controls. The size of the shutter and application will be determining which control is suitable.

Solutions for Rolling Shutters

البراك لستائر المعدنية

Wired Controls & Motors

IPSO

These motors are specially designed to enable an easy assembly of motorized rolling shutters. They do not have a push button limit switch device but the capacity to memorize their limits automatically when first installed due to a torque sensor mechanism. They are available between 6 and 25Nm.

Wireless Solutions

As a radio technology, RTS reduce the cabling to a minimum, that means it is restricted to the supply of the motor. All the RTS product are compatible, so an additional switch can easily be added.

Centralis RTS:

A remote control which seems like a fixed button, and the RTS receiver.

SL 2070

The RTS cosmic timer.

Telis 1, Telis 4

The moving remote control, with 1 or 4 channels.

LT RTS

LT RTS is an integrated RTS receiver motor. You have in it the RTS technology with all its functionality.

IPSO RTS

This family of motors has the same characteristics with the family of motors IPSO, but additionally includes built-in receiver of cordless technology RTS with alternating safety code. The cordless technology makes easier the mounting of rolling shutters with IPSO since there is no wiring required between the motor and the switch or any other control device. The grouping of more than one motor can be achieved with a simple programming. The IPSO RTS family is also available from 6-25 Nm.

Wired Solutions

Wired Controls & Motors

Inis Uno:

The single switch. One button for one motor.

Inis Duo:

The double switch. One button for two motor.

Chronis Uno:

The single motor weekly timer.

LS "Classic"

The smallest 230 V motor. It can be integrated in a 40mm tube. Class II it is very adapted to the renovation. Exists from 4 to 13 Nm.

LT "Classic"

The most used motor. It exists from 6 to 120 Nm for a tube 50 mini. Very easy to use, with its special "star head", it is always possible to set the limit switches.

LT CSI

It's a very small "help command" head. Exists from 10 to 120 Nm for a tube 50 mini.

المواصفات

شرائح الشتر : لقد صنعت شرائح الألمنيوم من صفائح الألمنيوم مسبقة الصنع وعبئت بالعازل الرغوي المناسب لسلامة البيئة . ان الشكل التصميمي لهذه المقاطع يجعلها مناسبة للتركيب بقياسات تصل إلى 5 , ٤م عرضا .
الألوان : تتوفر مجموعة واسعة من الألوان والتي تجعل واجهة المنزل جذابة للغاية .
صناديق الشتر : الصناديق مصنعة من الألمنيوم ومتوفرة بعدة مقاسات بحيث تزيل كافة العوائق لتركيب الشتر .
التشغيل : بالإمكان تشغيل الرول شتر يدويا أو بالريموت كنترول ، وهناك مجموعه كبيرة من المحركات المصممة لتشغيل الرول شتر قادرة على رفع أوزان تصل إلى ٥٢ كيلو غراما .
